

BTBW Presentation Audio / Video EQ Requirements

VIDEO:

Video Projector with HDMI input

(Or Electronic Display Screen, like a DCD Tile Matrix Video Wall etc.)

The Projector or EDS will receive only the HDMI video signal, no audio.

If the HDMI cable distance from our Laptop Computer **on stage** to the House Projector exceeds 50ft - the maximum that HDMI signal can travel - then the Venue / House has to provide the required HDMI Extenders (CAT6 cabling with HDMI transmitter and receiver) in order to send HDMI signal to Projector, up to a max of 300ft

A Projection Screen: 7 x 10 ft minimum size, preferably larger
(If Venue has a LCD Tile Matrix / Video Wall instead of a standard Projection screen, please state the size of the Video Display)

AUDIO: 6 XLR Mic / Line Mixing Board Inputs required

2 for Laptop Stereo outputs – we provided mini stereo to XLR cables

1 for JK's wireless 'narration' Headset Mic, Receiver output

1 for JK's 'Vocal' Mic

2 Matching Direct Boxes for Acoustic Guitars

For JK's Musical Performance:

1 Mic Stand with a short boom

1 Vocal Mic (Shure SM 58 or better)

2 Matching floor monitors

2 Matching sturdy Guitar Stands for 2 large body acoustic guitars
